The following special language terms are used throughout the product literature to indicate various levels of potential harm when

**IMPORTANT NOTE:**

Carefully follow the instructions and warnings included with this aircraft and any related accessories, components or parts (including, injury or even death.

**NOTICES AND WARNINGS OVERVIEW**

- **RF EXPOSURE WARNING**
  - Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference received, including interference that
  - These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment
  - Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
  - However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference
  - The FCC encourages the use of this equipment to ensure that it is compatible with the protected radio or television services. If this equipment
  - (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that
  - (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that

**FCC STATEMENT:**

- Interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment
- To comply with FCC RF Radiation exposure guidelines, connecting the accessory must not increase the RF power output of this equipment above the limits stated in the preceding paragraph.
- Interference to radio or television reception, which can be determined by turning the equipment off and on.
- Never charge a battery if any of the wire leads have been damaged or shorted.
- Never attempt to charge low voltage, ballooned/swollen, damaged or wet batteries.
- Never leave batteries, chargers and power supplies unattended during use.
- even catch fire.
- Store the LiPo battery at room temperature and in a dry area for best results.
- Do not over-discharge the LiPo battery. Discharging the battery too low can cause damage to the battery resulting in reduced power, flight
- be removed from service completely.
- discharging a battery that has begun to balloon or swell can result in a fire. A battery that has ballooned or swollen even a small amount must
- If at any time the LiPo battery begins to balloon or swell, discontinue charging or discharging immediately. Quickly and safely disconnect
- in a fire causing property damage and/or serious injury.
- To charge the LiPo battery you must use only the included charger or a suitably compatible LiPo battery charger. Failure to do so may result
- After flying/discharging the LiPo battery you must allow it to cool to ambient/room temperature before recharging.

**Quick Start Guide**

- GB203 LED Status Indicator
- Throttle/Altitude Control (for Mode 2)
- Take Still Photo Button (disabled)
- Elevator/Pitch Control (Mode 2)
- Start/Stop Video Recording Button (disabled)
- Status Indicators (for ST10+ battery, 5.8GHz WiFi and GPS)
- SD Card Slot (located under the battery)
- Gimbal Pitch Angle/Position Control Slider
- Buttons Volume Down/VolumeUp/Menu/Home/Back)
- Elevator/Pitch Control (Mode 2)
- Start/Stop Video Recording Button (disabled)
- Status Indicators (for ST10+ battery, 5.8GHz WiFi and GPS)
- SD Card Slot (located under the battery)
- Gimbal Pitch Angle/Position Control Slider
- Buttons Volume Down/VolumeUp/Menu/Home/Back)
